PROFESSIONAL SUMMARY

AI-focused Software Engineer with 4+ years of experience building scalable backend systems, AI-powered products, and microservices. Delivered features impacting millions of users across Samsung and Skillz, contributing to 15% revenue growth, 11% CAC reduction, and 90% infrastructure bandwidth savings. Skilled in Generative AI, AI-assisted development, Java, Spring Boot, AWS, GCP, system design, code reviews, and engineering best practices.

WORK EXPERIENCE

Software Engineer - 2 *Apr 2025 - Present*
Skillz Inc.

- Developed applications **from scratch** and maintained existing monolithic systems. **Tackled legacy system bugs** successfully.
- Mastered Java Code reviews** to identify bugs early.
- Complete New ELO Rating system implemented**
 - In order to increase the engagement on the platform, added a new ELO rating system for different levels of user.
 - Increased **net gaming revenue by 15%**.
 - Completely **lead this project end to end**. Coordinated across teams for project development and delivery.
- Added New Currency In the system**
 - Added a new currency with expiry attached to it.
 - It **Increased net gaming revenue by 9%**.
- Public channels Customer Emotion Detection Service**
 - Built summary service for public chat channels to analyze and understand consumer sentiment.
 - Used **Llama Model** through AWS for sentiment analysis.
- Progressive Tournament Game Format**
 - Created new progressive tournament system for users.
 - Increased DAU by 3%** with this new format.
- Push Notification System**
 - Built for new campaign-based architecture of PN using **Firestore FCM and Apple APNs**.
- Performance Based Referral system**
 - Created a **performance-based** referral system.
 - Reduced referral fraud and **lowered CAC (Customer Acquisition Cost) by 11%**.

Software Engineer *July 2022 - March 2025*
Samsung Research & Development Institute - Delhi

- Developed and maintained full-stack applications.
- Circle2Search (or Circle2Generate)**
 - Proposed and developed **Circle2Search for Samsung Interactive Whiteboards**.
 - Built a **scalable microservices backend** on Google Cloud Platform (GCP), handling millions of daily interactions with Generative AI (Gemini) for contextual responses.
 - Winner of Samsung Hackathon 2024**, presented at **ISE Barcelona 2025**.
- Smart Downloader**
 - Developed an innovative content distribution strategy, reducing server **bandwidth usage by 90% for 10 devices**.
 - Enabled **peer-to-peer content sharing**, minimizing redundant downloads. **Implemented as part of an A1 patent** for optimized data transfer.
- Ideation and Creativity**
 - Samsung Hackathon 2024 Winner and 2023 Runners up**. Won first prize in Samsung's Hackathon for Circle2Search feature on Interactive Whiteboard with Generative AI.
 - Samsung Great Innovative Idea award of 2024**. Received great innovative idea award for 3D model content player in Interactive Whiteboards.

PROJECTS

- FinTrack - Expenses tracking application**
 - Using FinTrack, user can add their expenses into categories. User can visualize the expenses using Graphs.
- Content Scheduling in Metaverse**
 - Integrated content scheduling in metaverse virtual model's textures through Content Management Server for Hackathon and possible Patent ideation.
- NEET-Exam**
 - Developed NEET Exam Project During Covid-19 Lockdown for NEET aspirants. It got total **1432 registrations**.
- FTP-Browser**
 - Web-based file manager. Similar to CPanel.
 - Full stack project developed in PHP, HTML, CSS, JavaScript and XAMPP server.

EDUCATION

B.Tech in Information Technology *Aug 2018 - July 2022*
IIIT Vadodara (CPI = 8.11)

- OOPs, Web Development, Operating System, Database Management, Machine Learning, Computer Networks.

ACHIEVEMENTS

- Samsung SPOT Award (3 times)**
 - Received Samsung SPOT award 3 times outstanding work dedication and going above and beyond to achieve goals
- Best Trainer Award 2024 (Tech Guru of Samsung)**
 - Received best competency development trainer award for the tear 2024.
 - Called best Tech Guru of 2024.
- Hackathon IIITVadodara**
 - Secured 3rd position in Hack IIITVadodara Hackathon of the year 2020.

ADDITIONAL INFORMATION

- Languages:** English, Hindi, Gujarati.
- Hobbies:** Biking, Foodie, Running, Reading
- Activities:** Google Cloud Platform Certification course, Solving DSA challenges in C++.
