

KUSHANG SHAH

SOFTWARE ENGINEER

+91 8780330874 | kushangshah9009@gmail.com | kelta-king.github.io | [LinkedIn](#) | [Github](#) | [LeetCode](#)

Software Engineer with expertise in building scalable and engaging systems, passionate about leveraging technology to transform enterprise industries. Proven track record of **innovation**, **system design**, and delivering impactful solutions for **better client experience**.

WORK EXPERIENCE

Skillz Inc.

Apr 2025 - Present

- **Progressive Knockout Tournament (New Game Format)**
 - Built the backend for a new **progressive knockout tournament format**, increasing player **engagement and retention**.
 - Format launched live; projected to boost **Net Gaming Revenue (NGR) by 30% by 2026**.
- **Discounted Entry Fee**
 - Developed a robust discounting engine for game entry fees with strict transaction idempotency.
 - Improved user conversion and contributed to a 7% increase in NGR.
- **Referral Feature Implementation**
 - Redesigned the referral flow to **reduce acquisition cost by 10%** and significantly **lower referral fraud**.
 - Implemented reward logic where referees receive bonus cash equal to the user's deposit amount.
- **VIP Account Manager Assignment Feature**
 - It automatically assigns top-performing 500 users to account managers, **ensuring balanced client distribution with idempotency**.
 - The system **maintains consistency by reassigning returning high performers to their original account managers**.
- **Loyalty Feature Revamp**
 - Revamped the loyalty program to **lower operational costs by 40%**, introducing 6 new user tiers with scalable benefits.
 - Implemented recurring **CRON-based processes to manage level progression** and rewards.

Software Engineer - Samsung Research & Development Institute - Delhi

July 2022 - Mar 2025

- **Circle2Search (or Circle2Generate)**
 - You can circle any part of the whiteboard screen and it generates the **Artificial Intelligence (AI) results** of that region.
 - Worked on LLM integration and got **96% accurate results** with Google Gemini.
- **SMART DOWNLOADER**
 - **Reduced downloading bandwidth** on server by implementing innovative downloading strategy. It distributes the downloading content in all the devices and then devices shares content internally.
 - It is the **implementation of an A2 patent**. It reduces the downloading bandwidth on server by **90% for 10 devices**.
- **Ideation and Creativity**
 - **Samsung Hackathon 2024 Winner**. Won first prize in Samsung's Hackathon for Circle2Search with Generative AI.
 - **Samsung Great Innovative Idea award of 2024**. Received great innovative idea award for 3D model content player in Interactive Whiteboards.

SKILLS I POSSESS

Languages & Technologies: Java, C++, JavaScript, SQL, Spring, SpringBoot, NodeJs, ReactJs, PostgreSQL, ML, AI

Tools & Skills: Github, Perforce, RDBMS, Amazon Web Services (AWS), Docker, Kubernetes, System Design, MicroServices.

Non-Tech Skills: Jira, Kona Client, Public Speaking, Communication, Team work and Cross team Collaboration.

EDUCATION

IIIT Vadodara (**B.Tech in Information Technology**) (**CPI = 8.11**)

Aug 2018 - July 2022

- OOPs, Web Development, Operating System, Database Management, Machine Learning, Computer Networks.

ADDITIONAL INFORMATION

- **Hobbies:** Biking, Acting, Walking, Foodie
- **Awards/Activities:**
 - Awarded **Best Employee of the Quarter** (Spot Award) 3 times at Samsung for innovation.
 - Received **Great Act Certificate from Chief Minister of Gujarat** for the performance at Statue Of Unity.
